Bargaining Update!

We presented many articles at the table and reached agreement on two, progress worth noting.

But we are still far apart on wages. Providence continues to refuse to bring forward wage proposals that are fair and that will allow us to recruit and retain the talented providers our community needs.

We remain united in pushing for a contract that values our work and ensures high-quality care for our patients.

Stay Strong. Stay Informed. Stay Involved.

Together, we can win the wages and protections we deserve.
